

I am a supporter and fan of Satelite Radio, more importantly XM Radio. While XM does not offer traffic and weather for my particular town or geographic area yet, I am very eagerly awaiting such service and I hope they keep expanding into this area. There are too many more important issues for congress to be involved with than trying to overregulate every industry. True capitalism thrives on an open and free market. Legislation such as HR 4026 goes against all of the free enterprise ideals that makes America, AMERICA... Land of the free... I live in Chip Pickering's district and so far have not seen him do anything in congress of benefit to me. And this is another example of the goverment regulating where regulation is NOT NEEDED...
